Gaps between the contigs are represented as runs of N. The order of the pieces is believed to be correct as given, however the sizes of the gaps between them are based on estimates that have provided by the submittor.

Submitted (02-APR-2002) The Institute for Genomic Research, 9712

Medical Center Dr. Rockville, MD 20850, USA

On Mar 5, 2002 this sequence version replaced gi:18767486.

* NOTE: This is a 'working draft' sequence. It currently

* consists of 34 contigs. The true order of the pieces

* is not known and their order in this sequence record is

* arbitrary. Gaps between the contigs are represented as

* runs of N, but the exact sizes of the gaps are unknown.

* This record will be updated with the finished sequence

* as soon as it is available and the accession number will

* be preserved.

On Mar 5, 2002 this sequence version replaced gi:18767486.

* NOTE: This is a 'working draft' sequence. It currently.

* consists of 34 contage. The true order of the pieces.

* is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as * runs of N, but the exact sizes of the gaps are unknown.

* This record will be updated with the finished sequence as soon as it is available and the accession number will

* be preserved.

NOTE: It currently consists of 1 contigs. Gaps between the contigs are peptesented as runs of N. The order of the pieces is believed to be correct as given, however the sizes of the gaps between them are based on estimates that have provided by the submitter. This sequence will be replaced by the finished sequence as soon as it is available and the accession number will be preserved.

* NOTE: This is a "working draft' sequence.

* This sequence will be replaced
